1. As part of your bonnet guard kit you will receive the appropriate installation hardware and accessories for your application.

2. Install the clamps for the bonnet guard.

3. Secure the clamps using the screws provided.

4. Remove the backing from any pre-installed double sided tape, place the protective strips between the clamp & bonnet before installing.

5. Some clamps may also use screws. Tighten these to secure the guard to the bonnet.

6. Some kits may also come with plastic blocks that sit between the guard and bonnet, stick these to the guard if required.
